The screenshot shows a web browser window displaying the Apache Jackrabbit website. The browser's address bar shows 'jackrabbit.apache.org'. The website header features the Apache Jackrabbit logo on the left and the Apache Software Foundation logo on the right. The main content area is titled 'Welcome to Apache Jackrabbit' and contains several paragraphs of text. On the right side, there is a navigation menu with sections for 'Apache Jackrabbit', 'Documentation', and 'Development'. The 'Apache Jackrabbit' section includes links for Welcome, Downloads, Articles, FAQ, Jackrabbit Wiki, and Jackrabbit History. The 'Documentation' section includes links for Getting Started, Standalone Server, Jackrabbit Components, First Hops, JCR & API, Jackrabbit Architecture, Deployment Models, Jackrabbit Configuration, Node Types, and Object Content Mapping. The 'Development' section includes links for Jackrabbit Team, Jackrabbit Roadmap, Building Jackrabbit, Mailing Lists, and Issue Tracker. The main content area also includes a 'Welcome to Apache Jackrabbit' section with a description of the content repository, a paragraph about the content repository's features, and a paragraph stating that Apache Jackrabbit is a project of the Apache Software Foundation. Below this is a 'Apache Jackrabbit News' section with two news items: 'August 23, 2011: Apache Jackrabbit 2.2.8 released' and 'June 7, 2011: Apache Jackrabbit 2.2.7 released'.

Welcome to Apache Jackrabbit

The Apache Jackrabbit[™] content repository is a fully conforming implementation of the Content Repository for Java Technology API (JCR, specified in [JSR 170](#) and [283](#)).

A content repository is a hierarchical content store with support for structured and unstructured content, full text search, versioning, transactions, observation, and more.

Apache Jackrabbit is a project of the [Apache Software Foundation](#).

Apache Jackrabbit News

August 23, 2011: Apache Jackrabbit 2.2.8 released
Apache Jackrabbit 2.2.8 is patch release that contains fixes and improvements over previous 2.2.x releases. See the [downloads page](#) for more details.

June 7, 2011: Apache Jackrabbit 2.2.7 released
